

## Exceptional tooling and low volume moulding solutions

**ARRK's portfolio of product development solutions includes an extensive array of Tooling and Low Volume Moulding services. We specialise in the design, development, manufacture and sourcing of mould tools and components for the plastics processing industry.**

Using our Technical Centres in the UK, mainland Europe, and sister companies around the world, we provide high quality mould tools. ARRK has considerable experience supporting clients in the Automotive, Medical, Consumer Products and Construction industries.

### **RAPID TO PRODUCTION TOOLS – WE CAN SUPPORT YOU**

We are focused on delivering a range of solutions that are tailored to suit the individual needs of our clients. Whether you need large, bumper sized tools or small, rapid tools, we can help. Being part of one of the largest product development companies in the world means we are able to offer clients a whole host of global solutions. We take the risk out of sourcing tools overseas, you take delivery of quality, European standard moulds or mouldings. Our parent company, ARRK Corporation, has companies across the globe, in Western and Eastern Europe, Asia and the Far East, whom we work closely with to deliver your Project on time and within agreed budgets.

Regardless of where your tools are being built, you'll only have to deal with our team of qualified project managers here in the UK. It's our job to liaise with the other ARRK global tooling facilities we appoint to build your tools. Our hassle free service really is your gateway to searching the globe for the right tooling option, knowing you can be confident that you will receive quality tools, supported by our UK Tooling and Moulding centre.

Our UK Tooling and Moulding technical centre also provides an on-site inspection, trialling and modification service to make sure your tools run smoothly here in the UK.

## MOULDING SOLUTIONS

With injection moulding machines varying in press size from 650 to 3200 tonnes, we can offer a low volume moulding service. This service is ideal for clients requiring short production runs and those in niche markets. We work closely with our clients to understand every aspect of their moulding requirements, even down to how and when their mouldings are delivered to them.

### At a glance:
